Our Innovative Approach

When you partner with Innovations with Innovative with Solutions Consulting, LLC, you get continuous ongoing systematic job-embedded professional development with instructional support you need:

Systemic and explicit strategies:

Change happens throughout an entire organization when a systemic approach integrates every level of a school or district into the change process to ensure success.

Collaborative leadership:

Dr. Feters works collaboratively with school and district leadership teams to review data, identify needs, plan solutions build knowledge and skills, and monitor implementation to ensure success. We assist you to "inspect what you expect."

Best Practice/Research-based:

We use the latest research in education and related fields to develop solutions and provide research-based professional development that is informed by the best available evidence.

Real-world expertise:

Dr. Feters has years of experience both in and out of the school and district setting and understands the need for innovative solutions that bridge theory with best practice for specific contexts.

Long-term support:

We work with you over an extended period to help you measure and improve the implementation and impact of the solutions we've developed with you.

Sustainability:

Dr. Feters builds the knowledge and skills of your team so your organization can build leadership capacity to continue and sustain the solutions we have developed and implemented together.
